DETAILED ACTION

Reissue Applications

This application is objected to under 37 CFR 1.172(a) as the assignee has not established its ownership interest in the patent for which reissue is being requested. An assignee must establish its ownership interest in order to support the consent to a reissue application required by 37 CFR 1.172(a). The assignee's ownership interest is established by:

(a) filing in the reissue application evidence of a chain of title from the original owner to the assignee, or

(b) specifying in the record of the reissue application where such evidence is recorded in the Office (e.g., reel and frame number, etc.).

The submission with respect to (a) and (b) to establish ownership must be signed by a party authorized to act on behalf of the assignee. See MPEP § 1410.01.

An appropriate paper satisfying the requirements of 37 CFR 3.73 must be submitted in reply to this Office action.

The assignment information from The Salk Institute for Biological Studies has blanks for the recordation of Reel No. and Frames.

The original patent, or an affidavit or declaration as to loss or inaccessibility of the original patent, must be received before this reissue application can be allowed. See 37 CFR 1.178.

Art Unit: 1653

Applicant is reminded of the continuing obligation under 37 CFR 1.56 to timely apprise the Office of any litigation information, or other prior or concurrent proceeding, involving Patent No. 5,700,778, which is material to patentability of the claims under consideration in this reissue application. This obligation rests with each individual associated with the filing and prosecution of this application for reissue. See MPEP §§ 1404, 1442.01 and 1442.04.

This application contains sequence disclosures that are encompassed by the definitions for nucleotide and/or amino acid sequences set forth in 37 CFR 1.821(a)(1) and (a)(2). However, this application fails to comply with the requirements of 37 CFR 1.821 through 1.825 as no CRF has been submitted for this application number. This application is a reissue of 08/458,499, which is in compliance with 37 C.F.R. 1.821-1.825. Applicant may make reference to the other application and computer readable form therein in lieu of filing a duplicate computer readable form in the instant application. In order to set up a CRF using the information of the parent application, a letter must be submitted requesting use of the previously filed sequence information. The letter must completely identify the other application, by application number, and the computer readable form, by indicating whether it was the only computer readable form filed in that application or whether it was the second, or subsequent, computer readable form filed.

Applicants have indeed claimed less than they were entitled to claim in the issued patent.

Art Unit: 1653

Specifically, the specification supports a claim wherein the J-004 peptide (SEQ ID NO:13) is glycosylated at Thr₁₀ (see column 3, line 56). It is stated in column 17, lines 26-31 that the native J004 conotoxin has a carbohydrate at Thr₁₀, which appears to increase bioactivity of the peptide.

Conclusion

This application is in condition for allowance except for the formal matters which are discussed above.

Prosecution on the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

A shortened statutory period for reply to this action is set to expire **TWO MONTHS** from the mailing date of this letter.
